

MAULIDA CAHYA KURNIA

Grobogan, Central Java, Indonesia | +6285602432362 | maulida.cy@gmail.com | [linkedin.com/in/maulidacahyakurnia](https://www.linkedin.com/in/maulidacahyakurnia) | Portfolio: maulida.vercel.app

Computer Science student with strong interest in Machine Learning, data processing, and ML-based web application development. Experienced in Python, Pandas, NumPy, scikit-learn, Next.js, Supabase, and Vercel deployment through academic and personal projects. Completed IBM Machine Learning Specialization and selected as a Top 20 Final Project Winner in Hacktiv8 x IBM SkillsBuild.

EDUCATION

Dian Nuswantoro University Semarang

Sept 2023 – Present

Bachelor of Computer Science – Informatics Engineering | GPA: 3.57/4.00

PROJECT EXPERIENCE

IDX StockRec – Stock Recommendation Web App (IDX)

Dec 2025 – Present

- Built a FastAPI-based stock recommendation system using Yahoo Finance OHLCV data.
- Developed explainable scoring, risk detection, watchlist, and post-trade logging features.

SITEMU – Campus Lost Item Reporting Platform

Oct 2025

- Developed a lost-and-found web app with image posting, search, category, and location filtering.
- Built the frontend with Next.js and integrated Supabase for database, auth, and storage.

TravelEase – Travel Recommendation Web App

May 2025 – Jun 2025

- Built a Streamlit-based travel recommendation app based on budget, location, and activity preferences.
- Processed and ranked destination data using Python, Pandas, and NumPy.

SoLearn – Task Management Web App | Top 20 Final Project Winner

Aug 2025 – Sept 2025

- Built a task management web app with CRUD features using HTML, CSS, and JavaScript.
- Implemented LocalStorage to save task data across browser sessions.

ACHIEVEMENTS

- **Top 20 Final Project Winner** – Student Developer Initiative, Hacktiv8 x IBM
- **Final Project Score: 89.42** – Code Generations and Optimization Transcript, issued Dec 19, 2025

CERTIFICATIONS & TRAINING

- **IBM Machine Learning Specialization – Coursera**
Completed: Oct 10, 2025
Covered EDA, supervised learning, unsupervised learning, deep learning, reinforcement learning, and ML capstone.
- **Student Developer Initiative – Hacktiv8 x IBM SkillsBuild**
Code Generations and Optimization | Dec 2025
Completed training on Generative AI-assisted workflows for code generation and optimization.
- **AI Engineer Independent Study Program – DBS Foundation x Dicoding**
Remote | Feb 2026 – Present
Learning Applied Machine Learning and AI engineering through Python-based ML projects.

SKILLS

- **Machine Learning & Data Processing:** Python, Pandas, NumPy, scikit-learn, Data Preprocessing, Basic Model Training, Basic Model Evaluation
- **Database:** MySQL, Supabase, Basic PostgreSQL
- **Web Development:** HTML, CSS, Basic JavaScript, Basic Responsive Web Layout
- **Tools & Deployment:** Google Colab, Jupyter Notebook, VS Code, Git, GitHub, Basic Vercel Deployment
- **Currently Learning/Familiar With:** Next.js, TypeScript, TailwindCSS, Streamlit, FastAPI
