Informatics Engineering undergraduate at Dian Nuswantoro University with experience in web application development, data processing, database integration, application testing, and system documentation through academic and team projects. Familiar with Python, React, Next.js, Supabase, PostgreSQL, and Git. Interested in applying technology and data skills to support digitalization, system development, and operational processes.

EDUCATION

Dian Nuswantoro University, Semarang

September 2023 – Present

Bachelor's Degree in Informatics Engineering | GPA: 3.65/4.00

PROJECT EXPERIENCE

Talang.in – Group Expense Management Application

May 2026

- Contributed to the development of transaction recording, expense splitting, group management, and transaction history features.
- Developed an automated transaction input feature and assisted with application testing and documentation.

VMatch – Managed Interior Service Web Application

March – July 2026

- Developed service workflows covering customer requests, task management, progress monitoring, and quality control.
- Built a landing page and dashboards for users, administrators, and vendors.

SITEMU – Lost and Found Reporting Platform

October 2025

- Developed a lost-and-found reporting application with image upload, search, category, and location filter features.
- Used Next.js and Supabase for the user interface, authentication, database, and image storage.

ACHIEVEMENT

Top 20 Final Project Winner – Student Developer Initiative, Hactiv8 x IBM SkillsBuild 2025

- Achieved a final score of 89.42 in the Code Generation and Optimization program.

CERTIFICATIONS AND TRAINING

- Coding Camp 2026 powered by DBS Foundation – AI Engineer Track**
February – July 2026
- IBM Machine Learning Specialization – Coursera**
October 2025
- Student Developer Initiative – Hactiv8 x IBM SkillsBuild**
Code Generation and Optimization | December 2025

SKILLS

- Programming:** Python, JavaScript, TypeScript
- Web Development:** React, Next.js, HTML, CSS, Tailwind CSS
- Data Processing:** Pandas, NumPy, scikit-learn
- Databases:** Supabase, PostgreSQL, MySQL
- Tools:** Git, GitHub, VS Code, Google Colab, Jupyter Notebook, Vercel
- Supporting Skills:** Application Testing, System Documentation, User Guide Preparation, Team Collaboration
